DESCRIPTORS \*Behavior Change; \*Class Management; Effective

Teaching: \*Learning Modules: \*Operant Conditioning

ABSTRACT

This module facilitates acquaintance with the application of behavioral principles in the classroom. It contains: (1) a pretest; (2) knowledge-based objectives and enabling activities; (3) demonstration-based objectives and enabling activities; (4) instructional personnel decision points; (5) two models demonstrating use of the module; (6) instructional personnel activities; (7) an observation form; and (8) a flow chart. Appendix G: Bibliography (not included)

# RATIONALE:

Classroom management rests on the Skinnerian application of operant conditioning to the classroom. Although criticized for its lack of humanism, behaviorism is a technology which provides a basis for effective instructional procedures. The purpose of this module is to acquaint teachers with the application of behavioral principles to the classroom.

# CLASSROOM MANAGEMENT PRE-TEST

I.	Video	tape	a	class	of	your	choice.
----	-------	------	---	-------	----	------	---------

- II. Analyze the class by answering the following questions:
  - 1. What were the learning behaviors desired of the student?
  - 2. Cite three examples of the S-R-R model operating in the class. Designate S, R, R.

Stimulus:

Response:

Reinforcement:

Stimulus:

Response:

Reinforcement:

Stimulus:

Response:

Reinforcement:

3. Cite three types of verbal and three types of non-verbal reinforcement

Verbal:

Non-Verbal:

- 4. Cite an example of a process modeled in the class. Describe it briefly and the contingencies operative in the classroom.
- 5. Time the instructional process in the class. hart at what times feedback occurs & what form it takes

Summarization occurred at:

III. Confer with instructional personnel to determine areas of need and applicable module sections. (See Instructional Personnel Section) Appendix A.

# RELATING PRE-TEST TO ACTIVITIES

The following parts of the pre-test relate to specific activities in the module. By ascertaining your score on each item and correlating those areas of need to the module activities, the module is more applicable. Complete this process with the I. P.

Module Sections

Part II

#1				2.1
#2				1.1, 1.2, 2.2
#3			.*	1.2, 1.3, 1.0, 2.2, 2.3
<b>#4</b>	e de la companya de La companya de la co	•		1.4, 2.4
#5		r		1.4, 1.5, 2.5

Write all activities in a small notebook. Key them to the activity number.

#### KNCW LEDGE-BASED OBJECTIVES AND ENABLING ACTIVITIES

- 1. Knowledge-Based Objectives & Enabling Activities
  The student will:
  - 1.1. explain the S-R-R model as it applies to student learning behaviors in the classroom.

#### Activities:

- 1.1.1 Read Chaps. 102 of The Technology of Teaching, B. F. Skinner
- 1.1.2. Observe another teacher or self-analyze the application of the S-R-R model in the classroom and cite five examples identifying stimuli, responses, and reinforcements.
- 1.2 explain contingencies as they relate to frequency ob behaviors.

  Activities:
  - 1.2.1. Read Chap. 4 and 7 of The Technology of Teaching, Skinner, and
    - 1.2.2. Write one-two paragraphs explaining how contingencies affect frequencies of behavior OR
  - 1.2.3. Observe another teacher and describe the contingencies, implied and overt, affecting student behavior. Select at least four contingencies and stipulate behavior affected.
- 1.3. explain the reinforcement of successive approximations of behaviors as it relates to a classroom.

#### Activities:

- 1.3.1 Review pp. 10, 16, 19, 67, 207 of The Technology of Teaching, Skinner, OR
- 1.3.2. Observe a class and determine a behavior to be shaped and the shaping process.
- 1.4. explain the sequencing of learning materials relevant to class-room instruction.

#### Activities:

- 1.4.2 Read "Developing a Competency for Sequencing Instruction," <u>Developing Teacher Competencies</u>, Weigand, ed.
- 1.4.2. Observe a teacher and chart the sequencing of the informational flow; indicate reinforces. Critique the lesson in a theoretical context indicating when the sequences should have been smaller/larger OR
- 1.4.3. Devise a lesson plan, indicating the sequencing of the information and appropriate reinforcements

- 1.5. explain the processes of feedback and summarization as they relate to the instructional process and student behaviors. Activity:
  - 1.5.1. Read. Chap. 3, The Technology of Teaching, Skinner.
- 1.6. demonstrate an understanding of Model I: The Behavioral Management of Learning Interaction (Appendix B) Activity:
  - 1.6.1. Peruse Appendix B and
  - 1.6.2. Observe a class and apply the Model to your observation citing principles and related behaviors actually occuring.

#### STOP:

Confer with the instructional personnel concerning those activities you choose to do. This conference will provide a basis for those objectives you need to pursue in the next section. (See Appendix A)

# DEMONSTRATION-BASED CBJECTIVES & ENABLING ACTIVITIES

- Demonstration-Based Objectives & Enabling Activities l. The student will:
  - 2.1. identify behaviorally desired learning outcomes for a group of students or individuals.

#### Activities:

- 2.1.1. Review Behavioral Objectives Modules and
- design behavioral objectives for a class or individual 2.1.2.
- evaluate those behavioral objectives within the con-2.1.3. text of a class.
- demonstrate an awareness of the use of S-R-R by choosing a 2.2. behavior to be changed and devising a plan, using S-R-R, to change the behavior.

#### Activities:

- peruse Model I "Discipline" (Appendix C) and 2.2.1.
- identify a behavior to be changed, identify reinforcers 2.2.2. to that behavior, and devise a plan to change it. and
- read dissertation; Stanley Herman OR 2.2.3.
- read Discipline or Disaster, E. Stoope & Joyce King 2.2.4. Stoops.
- use instructional personnel activity 2.2.5.
- Confer with instructional personnel (Appendix D) at this II. point (Appendix A)
  - use a variety of reinforcers in a classroom setting.
    - Activities:
    - self-analyze a class, determining your reinforcing behaviors and distinguish responses reinforced. OR
    - use instructional personnel activity Appendix D 2.3.2. (confer with instructional personnel)
  - 2.4. model a learning behavior desired of the learner.

#### Activities:

- choose a learning behavior to be model; plan the 2.4.1. modeling process; audio-tape/video-tape the modeling process.
- use instructional personnel activity, 2.4.2. Appendix D 2.4.2. (confer with instructional personnel.)
- 2.5. provide feedback and summaries at appropriate intervals during the sequence of instruction.
  - Activities: teach a class and chart times at which feedback and summarization occur.

- 2.5.2. describe the effect of the feedback and summarization on the learning process. OR
- 2.5.3. use instructional personnel activity 2.5.3. Appendix D
- IV. Confer with instructional personnel at this point.
  - 2.6. recognize the effectiveness of behavioral principles in the classroom by teaching a class utilizing these principles. Activities:
    - 2.6.1. video-tape a tape AND
    - 2.6.2. critique the class using the form of the pre-test. OR
    - 2.6.3. use instructional personnel activity, 2.6.3. Appendix D

Activities related to 2.6 serve as a post-test.

V. Confer with instructional personnel at this point.

APPENDIX A

INSTRUCTIONAL PERSONNEL DECISION POINTS

INSTRUCTIONAL PERSONNEL'S ROLE REGARDING PRE-TEST

1. The I. P. will, with the student, view the video tape, comparing the pre-test answers with the behaviors on the tape. The I. P. and student will jointly determine those specific areas of the module applicable to the needs of the learner. These sections are specified on page

# INSTRUCTIONAL PERSONNEL DECISION POINTS

The following is to provide a guide at each decision point. Confer with the instructional personnel concerning those activities you chose to do. This conference will provide a basis for those objectives in the next section.

#### III. Decision Point:

The instructor will, with the student

- 1.1. review the behavioral objectives written by the student; did the student in his/her evaluation
- 1.2. go over Model II "Discipline" with the student and evaluate the students' plans for behavior modification.
- 1.3. aid the student in deciding the next phase of the module applicable to his/her needs based on pre-test and conference.

#### IV. Decision Point:

The instructor will, with the student,

- IV. 1. review the student's analysis of reinforcing behaviors.
- IV. 2. review modeling process used by student.
- IV. 3. review student's chart of feedback and summaries.
- IV. 4. aid the student in planning the next phase of the module applicable to his/her needs based on pre-test and conference.

#### V. Decision Point:

The instructor will, with the student,

- V.1. review tape of class and assess student's evaluation.
- V. 2. aid the student in planning any remedial activities.

#### II. Decision Point:

The instructor will, with the student,

I. 1 confer with the teacher and review those activities the teacher chose to do.

APPENDIX B

MODEL I

Repetition

II. Shape students toward objectives with flexible management of stimulation and reinforcement keyed to student response

Student Stimulation (\_\_\_ Response \_\_\_ Reinforcement Involvement Social Learning of Variety part

15 CONTINUED ON NEXT PAGE RELATED BEHAVIORS

Get off to a purposeful start: Provide a learning focus so that non-learning behaviors are reduced. Define objectives Share objectives with students Define intermediate objectives Relate objectives

2.1 Show students how to perform Of students miss point provide clarification-model, demonstrate) Show the process of mastering an assignment)

2.2 Use chalk board frequently (for objectives, for student reinforcement, for providing cues)

2.3 Use variety of techniques (Deductive--inductive: Written--oral; teacher-student; class--group--individual)

2.4 Listen to student comments: define and interpret in terms of instructional needs and new objectives

2.5 Privide opportunities for both group and individual work (can give opportunity for individual support)

2.6 Give feedback at paced intervals (Break up assignments according to cues and difficulty of performance; shape performance requirements; return tests immediately; listening, etc.

2.7 Use students effectively and actively (Making up tests; helping other students; reflecting student comments verbally and on board, have student write on board)

- III. Meet the objectives--learning of whole by students (experiencing "I know it"--learning as a reinforcer)
- 3.1 End class period with summary or comment on learning progress.
- 3.2 Periodically re-evaluate effectiveness of both objectives and techniques based on student responses

EXPANDED MODEL OF BEHAVIORAL OPERATION II -- "Instruction"
ILLUSTRATING THE BEHAVIORAL MANAGEMENT OF LEARNING INTERACTION: INTERPERSONAL INSTRUCTION

APPENDIX C

MODEL II

# PRINCIPLES GOVERNING BEHAVIOR PROBLEMS IN CLASSROOM

BEHAVIORAL ANALYSIS OF INDIVIDUAL STUDENT BEHAVIORAL PROBLEMS

I	Deal with behavior problems within	
	fram ework of classroom educational	
	objectives	

Identify the problem in behavioral terms
When does the student misbehaveIs it related to social and
instructional needs

Consider individual problem as a behavioral management problem without personality involvement

What behaviorally does he do--Describe behavior

III. Evaluate the problem from the point of view of the learning interactions in the total classroom

What are consequences
Affect himself, other individuals,
teacher, class

IV Use positive reinforcement as an alternative to negative reinforcement whenever it is an appropriate alternative.

How frequent is misbel in Determine if it is sportant or periodic

Identify reasons for behavior

Instructional - Social

V Solution of the problem for the individual should include positive consequences for his educational and social behaviors, at least to those social behaviors which are pre-requisites for his learning

Identify what reinforces this student
Social reinforcement
Extrinsic reinforcement (grades)
Intrinsic reinforcement (learning per se)

orogress
(If solution is not possible within classroom, problem must be considered
a psychological-social one and dealt
with differently)

Apply appropriate strategies—
which enrich reinforcement of positive
behavior
(Relate to the reasons and the kinds of
reinforcement the student responds to—
example: peer approval, teacher-personal

VI Solution of problem should have positive effect on teaching-learning behavior in classroom

Determine if student needs services beyond classroom and seek appropriate administrative support

approval, learning success, (etc.)

To use Chart: (1) Determine reason for behavior

(2) Apply appropriate strategies in proper sequence

#### REASONS

- A. Don't understand
  (Objective too difficult)
- B. Bored (satiation)
- C. Caught between competing stimuli stimuli
  - Other students (social interaction)
  - 2. Objects, events, etc.
- D. Need for attention

  Disturbs individual student,

Lack of any instructional

stimulus (no lesson)

### STRATEGIES

- A. Give individual help, define easier individual objectives if this stude anot medicians objectives
  - offer additional at helping their students; demonstrate for class; independent work; special materials.
- C. Manage appropriate stimulation:
  - Increase stimuli: gesture, facial expression, walking near.
     Remove stimulus (other student) if it is a continual pattern.
  - 2. Ignore--if not distracting anyone else.

    Increase stimuli (make instruction more personal, private comments, adjust style so student is more involved)
- D. Manage appropriate stimulation and shape behavior:
  - 1. Give quiet warning! If unheeded, remove from student who are being disturbed.
  - 2. Define whether it is reason A or B and provide appropriate additional stimulation (develop climate for some productive achievement)
  - 3. Reinforce any positive consequences that arise from that activity.
  - 4. Ignore any further efforts to gain attention for negative behavior while trying to develop positive behavior. Do not pay continual attention to misbehavior.

23

- 5. Remove from class
- E. Re-examine teaching behaviors. If too many students are giving problems, attention must be given to your own behavior. (Return to Behavior Operation II)

INSTRUCTIONAL PERSONNEL ACTIVITIES

#### INSTRUCTIONAL PERSONNEL ACTIVITIES

The role of the instructor is vital to the success of the module. The instructional personnel activities relate to specific demonstration-based objectives and are essential to the student's understanding.

#### Instructional Personnel Activity

- 2.2.5. The instructor will
  - 2.2.5.1. confer with the teachers to determine behavior to be changed.
  - 2.2.5.2. in the classroom chart the frequency of the behavior before teacher iniates "operant conditioning."
  - 2.2.5.3. confer with teacher to establish plan to change behavior
  - 2.2.5.4. chart, over a period of 4 days, the frequency of the behavior after iniation of operant conditioning.
  - 2.2.5.5. confer with teacher to determine adjustments to plan.
- 2.4.2. The instructor will:
  - 2.4.2.1. confer with teacher to determine behavior to be modeled.
  - 2.4.2.2. observe modeling process, provide feedback concerning the
    - a) sequencing of information
    - b) appropriate reinforcers
- 2.5.3. The instructor will:
  - 2.5.3.1. observe a class
  - 2.5.3.2. chart times during the class when feedback occurred.
  - 2.5.3.3. attempt to determine effects of the feedback
  - 2.5.3.4. confer with teacher around process
- 2.6.3. The instructor will:
  - 2.6.3.1. observe the class during the taping.
  - 2.6.3.2. using observation form (Appendix E) to provide feedfeedback to teacher.
